Clementine Garoche

3D Environment Artist - Technical Artist

Montpellier (France) | +33 6 47 92 49 29 | c.garoche@gmail.com | https://www.artstation.com/clementineg

French native
English C1

Education

Bachelor Game Art - ***Institut Artline*** - 2024-2026

PhD in Biology (Ecotoxicology) - ***University of Rennes*** - 2014-2017

Professional experience

VFX Internship - ***R&D, OLM Digital (animation studio)*** - **April 2026 - October 2026 (6 months)**

Built a procedural, stylized ocean wave shader in Maya/Arnold for a toon-shaded VFX pipeline, Pokémon-like. MEL and Python coding, Bifrost, BOSS, visual programming. Export as a Maya and After Effects plugin.

Academic and personal projects

Tevarua - *Stylized third-person puzzle-adventure game (UE, 10-week group project)*

End-to-end technical art: Master Materials, Blueprints, procedural generation, prop modeling/texturing, VFX, character locomotion, version control, writing documentation.

The Lighthouse - *Environmental first-person exploration game (UE, 5-week project)*

Blueprints, procedural environment, foliage, VFX, prop modeling/texturing, version control.

Curiosity Cabinet - *Narrative interactive scene (UE, 5-week project)*

Interaction and inspection system, prop modeling, sculpting, texturing, procedural generation, traditional illustrations.

Underwater Base - *Modular environment (UE, 5-week project)*

Trimsheet-based modular kits, prop modeling/texturing, water shading.

The Pagoda - *Stylized third-person night exterior scene (UE, 5-week project)*

Character sculpting, retopology, rigging, skinning, locomotion, prop modeling/texturing.

Oriental Market - *Themed exterior scene (UE, 5-week project)*

Prop modeling/texturing, procedural generation, physics simulations, vertex painting, version control.

Switchy - *Pixel Art third-person game (Construct 3, 5-week group project)*

Game design, programming, creation of sprites and animations (characters and props).

The Rookies - *4 solo/group game projects*

2D character concept art, prop modeling/texturing, physics simulations, following creative briefs.

Unreal Engine 5 (UE) | Blender | Maya | 3dSMax | MotionBuilder | Substance Painter | Substance Designer | Houdini | Speedtree | Diversion | GitHub | Python

Past experience (biology researcher)

Designed international research projects, developed tools and programs to manage, analyze, and visualize data (**Python**), programmed robots, wrote protocols, reports, and scientific publications, presentations at international conferences.
